TECHNICAL SKILLS

- ***Programming Languages:*** *Python, Typescript, Javascript, Java, C, C++, Lua, Nix, Bash*
- ***Frameworks:*** *Django & DRF, Flask, Next.js & React, Tailwind CSS, Bootstrap*
- ***Database:*** *PostgreSQL, MongoDB, MySQL, SQLite*
- ***Design & Architectural Patterns:*** *MVT, MVC, REST, SOLID*
- ***Other Tools:*** *Docker, Redis, Celery, Gunicorn, Git, JWT, Vite, GNU-Linux, SQLAlchemy, Postman, Figma, HTML, Jinja, CSS*

EDUCATION

- **Bachelor of Technology in Computer Science & Engineering** (CGPA: **8.11**) Brainware University, Kolkata, India [2022 - 26]
- 12th Standard (**ISC**): **93%** [2021], 10th Standard (**ICSE**): **93%** [2019] Young Horizons School, Kolkata, India

EXPERIENCE

Software Engineer (Freelance) — **Curators Mark - Freessentia Ventures Pvt. Ltd.**, Kolkata, India [Dec 2024 - Present]

- Company: Ad-Aqua, Kolkata, India [analytics.adaqua.co.in/analytics-demo]
  Tech Stack: MongoDB, Tanstack-Query, Next.js, React, Typescript, Prisma, Figma, Tailwind CSS
  - Engineered **dynamic QR code generation** with **consumer data tracking** before redirection to client ads.
  - Provided **consumer insights** to clients by building an **Analytics Dashboard** with charts & metrics.
- NGO: CareGrow, California, USA [caregrow.org]
  Tech Stack: Next.js, React, typescript, Sanity, TailwindCSS, Figma, drizzle, Stripe, Cloudflare R2, PostgreSQL
  - Built a **CRM** integrated with existing workflows to manage applications & donations, and a **Sanity-powered blog & CMS**.
  - **Integrated Stripe** for secure online donations and developed a **responsive PWA** with **automated email receipts**.
- Company: Desi Elegance, Kolkata, India [desielegance.in]
  Tech Stack: Next.js, React, typescript, CSS, Figma, Canva, Vercel
  - Redesigned the storefront with a mobile-first UI, optimised product imagery to **reduce loading time** by **~90%**, and introduced landing-page CTAs to **improve product discovery** & engagement.
  - Integrated Vercel **Analytics & Speed Insights** and **improved SEO** through structured metadata & sitemap.
- Other projects: [anpfaculty.com], [curatorsmark.com], [atomcare.life]
  Tech Stack: Nextjs, React, typescript, Figma, Tailwind, Vercel, Redis
  - Delivered client **projects end-to-end**—from requirements analysis and UI/UX design to **development**, **testing**, **deployment**, and **maintenance**—ensuring solutions aligned with business requirements and technical constraints.
  - Developed portfolio websites with application workflows, **automated SMTP communications**, implemented **rate-limiting**, and production infrastructure, while coordinating technical solutions, **cost/time estimates**, and **resource allocation**.

PERSONAL PROJECTS

- **Binge Watch** [binge-watch.dampdigits.dev]
  Repositories: [gitlab.com/dampdigits/binge-watch-backend], [gitlab.com/dampdigits/binge-watch-frontend]
  Tech stack: Django, DRF, Docker, React, Javascript, Vite, Gunicorn, Bash, Render, Vercel, Gitlab, Postman
  - Engineered a **Netflix-inspired PWA** for movie/TV **discovery**, **playback**, and persistent **continue-watching** functionality.
  - Containerised & deployed the **Django REST backend** with **Docker/Gunicorn** and structured the codebase around reusable components, class-based mixins, and feature-oriented modules for maintainability.
- **Whisp Media Processor** | Repository: [github.com/dampdigits/whisp-media-processor]
  Tech Stack: Flask, Python, FFmpeg, OpenAI Whisper, Cloudflare R2, boto3
  - Built an **asynchronous media-processing pipeline** that converts **WebM recordings to H.264 MP4** with synchronised audio and **soft subtitles**, while supporting configurable Whisper-based transcription models.
  - Integrated Cloudflare R2 via Boto3 for automated **chunk storage and lifecycle management**, with **REST APIs**, error recovery, and optional resource cleanup.
- **Event-Buddy** | Repositories: [github.com/orgs/EventBuddy-org/repositories]
  Tech Stack: Next.js, TailwindCSS, Flask, Streamlit, Telegram Bot API, Cloudflare Generative AI
  - Developed an event platform that **generates promotional posters** using AI, and **automated Telegram**-based organiser updates through a **Flask API** & Streamlit bot interface.
- **Stockplay** | Repositories: [github.com/dampdigits/stockplay]
  Tech Stack: Flask, Jinja, SQLite, Bootstrap, Yahoo Finance API
  - A stock-**trading simulator** integrating **live market data** with portfolio & performance tracking for risk-free trading analysis.

ACHIEVEMENTS

- Two-time **Winner** of Bluster **DSA Tournament** at Texibition, Brainware University. [Links: 2025 winner, 2024 winner]
- **Won** the **48hr Hackathon** at Dev Innov8+ 2024, Brainware University. [link]
- **Won** 2nd Runner Up in Yuktikala 2024 (**Competitive Programming**) at Nirdesh, RMVC College, Kolkata. [link]
- **District Award** from **Rotary Club** of Calcutta Presidency for Community Service and Social Works, 2020.
